

SHAKTI DANGOL

Junior Software QA Engineer | Manual, API & Database Testing

Kathmandu, Nepal | +977-9749717321 | shakti.try99@gmail.com

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software QA intern at Higain Labs with a prior frontend and Laravel development background. Writes and executes manual test cases, reports defects with clear evidence, and tests REST APIs in Postman and data in SQL. Works within SDLC, STLC, and Scrum workflows, and understands how web applications, authentication, and databases fit together.

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, Cross-Browser Testing, UI Testing, Positive and Negative Testing

Test Design: Test Scenarios, Test Cases, Requirement Analysis, Boundary Value Analysis, Equivalence Partitioning, Decision Tables

API and Database: Postman, REST API Testing, HTTP Status Codes, JWT/OAuth Authorization, SQL (SELECT, JOIN, WHERE), CRUD Validation, Data Validation

Defect and Debugging: Bug Reporting, Defect Tracking, Defect Lifecycle, Jira, Chrome DevTools, Network Inspection, HAR Files, Root Cause Analysis

Process: SDLC, STLC, Agile, Scrum, Risk-Based Testing, Test Planning

Development and Tools: HTML, CSS, JavaScript, React.js, Tailwind CSS, PHP (Laravel), Git, GitHub

SOFTWARE QA INTERNSHIP

Software Quality Assurance Intern | Higain Labs (On-site, Lalitpur)

July 2026 – Present

- Analyze requirements and user stories in Scrum workflows to identify test scenarios, mapping happy and unhappy paths with flowcharts and use case diagrams.
- Write and execute functional test cases using equivalence partitioning, boundary value analysis, and decision tables, covering positive and negative scenarios.
- Run smoke, sanity, and regression tests on new builds and verify behavior across Chrome, Firefox, and Safari.
- File defect reports with reproduction steps, expected vs. actual results, severity and priority, and network evidence (HAR files, request payloads) so developers can reproduce issues quickly.
- Test REST APIs manually in Postman, validating status codes, headers, and response bodies, and use browser and application logs to separate client-side (4xx) from server-side (5xx) errors.
- Validate data with SQL queries (SELECT, JOIN, WHERE) after UI actions to confirm CRUD results and key and NOT NULL constraints.

PROFESSIONAL EXPERIENCE

Frontend Developer | Beyond Tech Nepal Pvt. Ltd. (On-site)

September 2025 – March 2026

- Developed Gurukul LMS, a role-based learning platform for students, teachers, and admins, covering authentication flows, access control, and course management.
- Built responsive, cross-device interfaces with HTML, CSS, JavaScript, React, and Tailwind CSS for Gurukul LMS, Bandipur Eco Hotel, Ivory Herbal, Bandipur Bajar Ghar, and World Honey Shop.
- Implemented Laravel backend features, including CRUD operations, authentication, and role-based access control, using MVC architecture and Eloquent ORM.
- Debugged frontend issues with Chrome DevTools (network requests, console errors, layout), building working knowledge of UI, backend, and database data flow.
